

YILGARNIA WINES

Vintage Report 2007

The 2007 vintage was 4 weeks earlier than any previous year. The winter was cold and wet as usual, but the spring was dry and warmer. The warm, dry spring continued into the summer months, which resulted in an early bud burst & our earliest vintage. In fact we completed this year's vintage, before commencement of last year's harvest. The Sauvignon Blanc was easily managed under these conditions, was disease free and required few sprays. The fruit was ripe by late February, was sound with great flavours.
