

YILGARNIA WINES

Vintage Report 2008

Pruning was finished by mid July 2007. Following a warm spring, late in November a heavy hailstorm resulted in damage to the shoots of the Shiraz and part of the Chardonnay, hence yields in these varieties were down. A following hot dry summer meant an early vintage with harvesting completed by end of March 2008. The fruit was disease free and had excellent flavours.
